

Founded in 1997, InduSoft offers a powerful family of industrial software products for developing Windows®-based applications in industrial automation, instrumentation and embedded systems.

Today, InduSoft's strategy is to empower people and companies to develop graphical interfaces, integrate web browsers, and take advantage of Internet connectivity.

InduSoft provides leading-edge technology that uses the Internet to access data that is stored on industrial devices and test and measurement equipment. In addition, InduSoft tools and technologies convert personal computers, web browsers, and such remote productivity devices such as cell phones, pagers, and personal digital assistants (PDAs) into industrial automation and test and measurement systems.

Water and Waste Water Applications

Remote monitoring

InduSoft Web Studio provides continuous monitoring for unmanned pump stations and lift stations via remote connections that can use TCP/IP by monitoring facilities via wireless radio modems, point-to-point networks or even satellite connections. Remote monitoring with InduSoft Web Studio software keeps city workers efficient, allowing them to send information to a central facility to monitor tank levels, oxygen levels, flow rates and alarms.

Traceability

The security system built into InduSoft Web Studio has the ability to monitor user access, log maintenance records, and track changes to set points and adjustments. It also treats threats to vital city services with respect and caution. Having the knowledge and assurance that everyone involved has done what they were supposed to do will allow you to focus on the more important issues such as improving operations and product quality. Regulatory data collection and reporting are easily accomplished via InduSoft Web Studio.

Come visit the Davis Controls booth at the following:

Western Ontario Process & Automation Show

Dante Club
1330 London Road
Sarnia, ON N7S 1P7
Tel: (519) 542-9311
11:00 am - 6:00 pm
April 28, 2010

Nova Scotia Process & Automation Show

Casino Nova Scotia
1983 Upper Water Street
Halifax, NS B3J 3Y5
Tel: (902) 425-7777
9:00 am - 4:00 pm
May 18, 2010

Newfoundland Process & Automation Show

Delta St. John's
120 New Gower Street
St. John's, NL A1C 6K4
Tel: (709) 739-6404
11:00 am - 6:00 pm
May 20, 2010

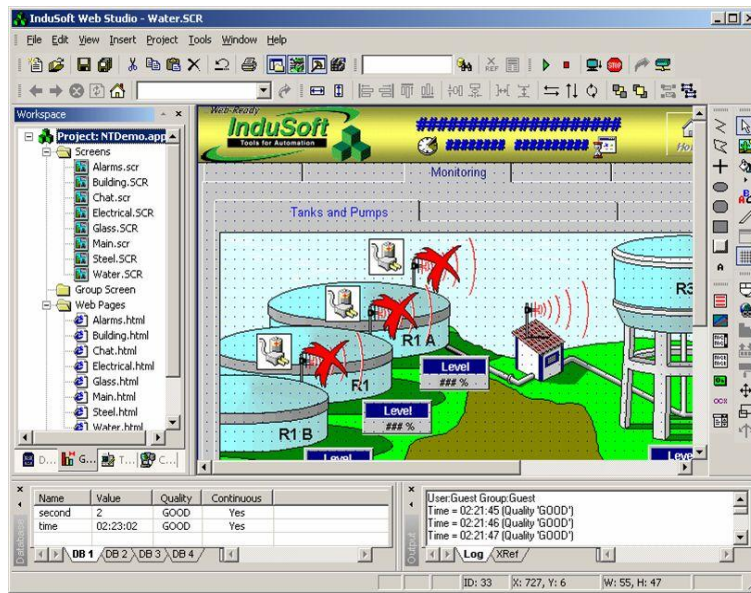

Pump Monitoring

By trending pump efficiencies (inputs, outputs and power consumed), predictions can be made as to how long they will last and foresee when they will fail. InduSoft Web Studio can graphically show trend data over long periods of time so you know when pumps are operating and make adjustments that can save energy by operating pumps at off-peak times. InduSoft Web Studio is able to monitor pump availability, starts/stops, capacity limits and total runtimes all in one software.

Distribution

Hundreds of kilometers of pipes and underground distribution systems can be a lot to manage. Reduce the headache and let InduSoft products simplify the task. Reliable solutions, remote flexibility and decreased costs are all provided by real-time information applications created with InduSoft Web Studio.
