

Parker's Filtration and Separation Division is the worldwide leader in filtration, separation, and gas generation products serving a wide range of industries from manufacturing to transportation; from life sciences to food and beverage.

Parker offers a wide range of Balston products for industrial applications including: Coalescing Compressed Air Filters, Sample Filters, Vacuum Pump Inlet and Exhaust Filters, High Efficiency Liquid Filters, Filters for Hospital Applications, Natural Gas Filters, 0.01 Micron Membrane Filters, Steam and Sterile Air Filters for the Food Industry, Nitrogen Gas Generation Systems, and Compressed Air Dryers.

PSA Nitrogen Generators

- Lower cost ...eliminates the need for costly gas cylinders
- Complete package with prefilters, final filters, and receiving tank
 - Compact - frees up valuable floor space
- Eliminates unexpected shutdowns due to a "bad" or empty cylinder
 - Hassle-free, easy to install, and easy to operate
 - Safe and reliable

Membrane Nitrogen Generators

Applications:

- Solder reflow ovens
- Food processing and packaging
- Electronic component storage and manufacture

- Heat treating
- Degassing aluminum
- Plastic extrusion and molding
- Gas assist
- Laser cutting

Balston Monobed and Dual Bed PSA Nitrogen Generators offer a less expensive, more efficient and reliable alternative to nitrogen gas cylinders, Dewars and bulk nitrogen. Wherever there is a need for nitrogen, Balston Nitrogen Generation Systems are capable of providing it for one tenth to one half the cost of merchant nitrogen.

Balston PSA Nitrogen Generators produce up to 99.95% pure, compressed nitrogen at dewpoints to -70 degrees F (-56 degree C) from nearly any compressed air supply. The generators are designed to continually transform standard compressed air into nitrogen at safe, regulated pressures without operator attention.

Balston PSA Nitrogen Generation Systems completely eliminate the inconvenience and the high costs of nitrogen Dewars, bulk nitrogen supplies, and cylinders. There is no need to depend on outside vendors for your nitrogen gas supplies. The hassles of changing dangerous, high pressure cylinders, and interruption of gas supplies are completely eliminated. The Balston PSA Nitrogen Generators offer long term cost stability eliminating uncontrollable vendor price increases, contract negotiations, long term commitments, and tank rentals.
