

As a global specialist in process and temperature control, West Control Solutions' product portfolio consists of four leading brands, CAL, Partlow, PMA and West Instruments. For more than 90 years' these benefit rich brands have been providing performance and quality to markets including Plastics, Ovens and Furnaces, Packaging, Food and Beverage and Life Science.

West Control Solutions is committed to developing close working relationships with its customers. The company regularly carries out customer research; ensuring awareness of its customers' requirements throughout the whole business. It is used during new product development to ensure customers' wants and needs are captured.

Partlow

Basic: DataVU5

- 5" TFT Display
- 3 or 6 Channels
- Relays and DI/DO available
- Ethernet available
- Basic web server

Advanced: DataVU7

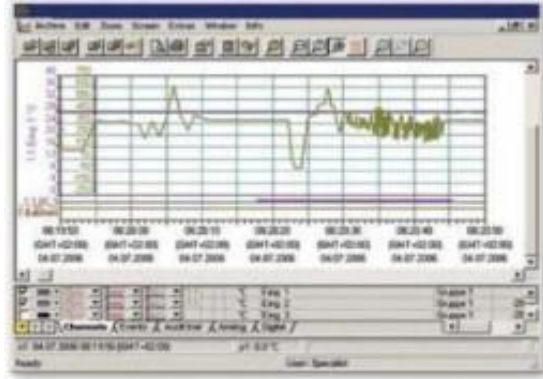

- 5.5" TFT Display
- 3 to 42 Channels
- Relays and DI/DO available
- Enter comments on the chart
- Flexible - add upgrades in the field
- Bar Code reader port
- Easy to integrate –

Ethernet is standard

- Full web server: see it from anywhere!

DataVU is better because

- it's easy to view history at the unit – find problems fast!
- data is easier to read/report – pass your audits with ease!
- it displays data your way: trace, numerical, or bar graph
- it stores months to years, and automatically downloads
