

Connecting your challenges to solutions

For over 60 years, Omega Engineering has been a global leader in the technical marketplace — now offering more than 165,000 state-of-the-art products that provide sensing, monitoring, and connectivity solutions.

The Omega Advantage

- Single source supplier of highly engineered products and customized solutions
- Global leader focused on bringing innovative technology to the market
- Engineering team available to accommodate all your needs and to provide expert technical support
- Extensive learning library of technical content available 24/7

Aerospace	Metals
